The 15th CSR and Sustainable Development Forum

INTRODUCTION

In alignment with the directives of His Excellency President Abdel Fattah El-Sisi, the Egyptian government is actively pursuing sustainable development across all sectors as part of Egypt's Vision 2030 which aims to mobilize and unify efforts at various levels, fostering integration among stakeholders and international institutions to enhance sustainable economic growth while considering social and environmental dimensions. Thereby accelerating sustainability achievement, ensuring equitable distribution of development benefits for current and future generations.

The 15th edition of Egypt CSR and sustainable development Forum, themed "Leadership towards Sustainable Impact and Growth", highlights the critical role of effective leadership in promoting sustainable development. The forum will present mechanisms and strategies that assist decision-makers in implementing sustainability standards and integrating supply chain partners into this approach, thereby enhancing corporate vision and team performance, strengthening institutional capabilities, and improving workforce efficiency to navigate evolving challenges.

Throughout its days, the forum will discuss a wide number of various topics to harmonize concepts and frameworks guiding organizations toward sustainability, with an emphasis on the tangible benefits that accrue to business owners and decision-makers, including increased productivity, cost reduction, and expanded market access. Moreover, through interactive roundtables, the forum will spotlight sectors confronting continuity and survival challenges.

This year, the forum addresses Key topics including; the integration between sustainability standards and the ambition towards the new industrial revolution SUS 4.0 and INDUS 5.0, as well as the latest technological tools and digital solutions that enhance environmental and social performance as the evolution of sustainability standards relies significantly on advanced technology for precise measurement and impact assessment.

Additionally, the forum will feature diverse discussions on the role of Six Sigma tools and techniques in driving sustainability, how to foster the knowledge capital and what is the importance of sustaining institutional knowledge. In addition to exploring sustainable finance evolving concepts and challenges, effective financing tools, and the mechanics of the carbon credits market growth, alongside sustainability bonds and sukuk, which serve as bridges between environmental investments and local capital markets.

The forum will also shed light on CSR empowerment strategies and activities as well as it will outline strategies for accessing new markets and boosting export rates, addressing quality standards compatible with environmental sustainability, and showcasing successful experiences of sectors that have significantly enhanced Egyptian exports and sustainability frameworks.

The forum provides an intensive program of practical and insightful workshops and experts' talks by global, regional, and local professionals from top consulting firms and organizations with relevant experience. It will cover topics such as ESG, COSO Framework, Carbon Footprint Measurement, and Responsible Finance. Other areas of focus will include the Carbon Border Adjustment Mechanism (CBAM), Social Value measurement and reports, the Climate-related Financial Disclosure Framework (TCFD), EDGE, Environmental Product Declaration (EPD), GHG Protocol standards, green supply chains, and green export standards. It is worth noting that the forum has served as the largest interactive platform for the business and sustainability community for over 10 years, aiming to raise awareness, build institutional capacity, and increase stakeholder engagement in Egypt's development. It gathers government bodies, the private sector, experts, civil society, and researchers, having achieved numerous successes, impactful partnerships, and influential initiatives in the previous editions.

We Are Looking To Amplify The Partnership On SDGs Localization

Stakeholder

550

More than 550 stakeholders from government, international organization, experts

Action

45

More than 45 networking event matchmaking gathering during the past 10 years

Impact

12

We launch 12 initiatives in collaboration with private sector, NGOs, and government to make viral impact on society

OUR STORY

SINCE 2014

The first platform that brings together those interested in sustainable development in Egypt to exchange experiences, unite efforts and build capacities.

SINCE 2018

The first platform of its kind to unite individuals who are passionate about climate issues, the transition towards green economy, and mechanisms of procuring the essential funding to support these initiatives

ESTEDAMA

SINCE 2022

A professional platform focuses on delivering scientific content, studies, research, and reports that cater to various sectors in order to integrate sustainability standards and build capacities within them.

SINCE 2023

The first social media platform to be launched in the Middle East that aims to spread the culture of sustainability through encouraging discussion among individuals interested in sustainable development

CSR Egypt

SINCE 2016

The first news portal that comprehensively reports on the social responsibility and sustainable development endeavors undertaken by private entities, civil society, and government.

SINCE 2022

An interactive platform that shapes a shared vision among stakeholders in various sectors through targeted round table discussions

SINCE 2023

A novel educational platform for kids that offers simplified cartoon based content on sustainable development concepts. The ultimate goal is to inculcate a culture of sustainability among future generations and encourage them to practice it in their daily lives.

Susplanet

SINCE 2023

The professional platform that encompasses all aspects of sustainable development. It offers a wide range of resources including events, news, articles, and research all in one location.

FACT SHEET

4,600

Interested Partners

CSR Egypt has successfully conducted activities and events that have contributed to enhancing sustainable development and institutional efficiency across various sectors by engaging more than 4,600 participants. The company has provided technical assistance, facilitated communication between involved parties, and promoted its activities related to social responsibility, sustainable development, green economy, and institutional capacity building.

4

Initiatives

- Hemaya
To confront the Covid 19 pandemic. It has served more than 250,000 families
- Marakeb Rezk
Economic empowerment and supply chain support for small-scale fishermen
- Marakiz Estedama
Women's economic empowerment initiative to support heritage and hand crafts
- Le Misr
A health initiative to improve the quality of life of the Egyptian child institutional capacity building.

DAY 1 : Sustainability Leadership

01 Opening Speech

02 KEYNOTE SPEECH

Sustainability Leadership Principles

Speaker:

- **Mr. David Brownlee**, CEO of The Brownlee Group LLC

03 EXPERT TALK

Leadership's Role in ESG Transformation

Overview:

In an era where environmental, social, and governance (ESG) considerations are reshaping the business landscape, effective leadership is crucial for successful organizational transformation. The talk explores how leaders can drive meaningful ESG integration, moving beyond compliance to create lasting sustainable value. Through practical insights, participants will understand the critical role leadership plays in embedding ESG principles into organizational strategy and operations emphasizing actionable approaches that leaders can implement immediately while maintaining a long-term perspective on sustainable business transformation.

Speaker:

- **Dr. Maali Khader**, Founder & CEO of Schema

04 FIRST SESSION

How Can Digital Products control and boost the Environmental and Social Performance of Companies?
(Sustainability 4.0) VS (Industry 5.0)

DAY 1 : Sustainability Leadership

Overview:

Digital transformation is currently playing a crucial role in the sustainability journey of institutions and business models, as it significantly contributes to enhancing performance efficiency, promoting sustainability practices, reducing costs, as well as improving operations, preserving the environment, and developing human capital. There has also been a great evolution and accuracy in assessment, monitoring process, because of the advancements in measurement and reporting technologies, which positively reflect on growth rates, course correction, and maximizing the environmental and social impact of institutions, and various business models to ensure they achieve their goals and commitments to the environment and the SDGs.

This session will discuss the opportunities of digital transformation for building a more sustainable future for businesses, and how to leverage the advanced technologies to enhance sustainability performance and ESG reports with better quality and accuracy. It also showcases the most innovative technologies, including Artificial Intelligence (AI), the Internet of Things (IOT), automation, augmented reality, big data, and more.

As well as addressing emerging technologies, and how to integrate them with sustainability strategies and standards thereby empowering companies and institutions to enhance their operations, competitive capabilities, and environmental performance in order to ensure their sustainability.

Key Topics:

- The role of technology in driving industrial leaps and sustainable development.
- The impact of digital transformation developments on institutional performance patterns.
- The latest tools and technological applications used in managing and measuring environmental and social impact.
- Mechanisms to integrate innovation strategies with business plans.
- Mechanisms of integrating digital transformation and institutional cultural for enhancing human capital efficiency.

05 EXPERT TALK

The Linkage!!! (The Interconnectedness of Environmental Sustainability Concepts)

Overview:

This Expert talk will show the complex connections between several key concepts in environmental sustainability popular and requested now a days including Life Cycle Assessment (LCA), Product Carbon Footprint, Environmental Product Declarations (EPD), the Carbon Border Adjustment Mechanism (CBAM), and Organizational Carbon Footprint.

DAY 1 : Sustainability Leadership

Through this talk also will identify the interdependencies and synergies among the data required to meet the requirements of these concepts and opens discussion on how organizations may benefit from the Linkage between these concepts.

Speaker:

- **Dr. Nasser Ayoub**, Managing Director of EPD MENA and CEO of EPD Egypt.

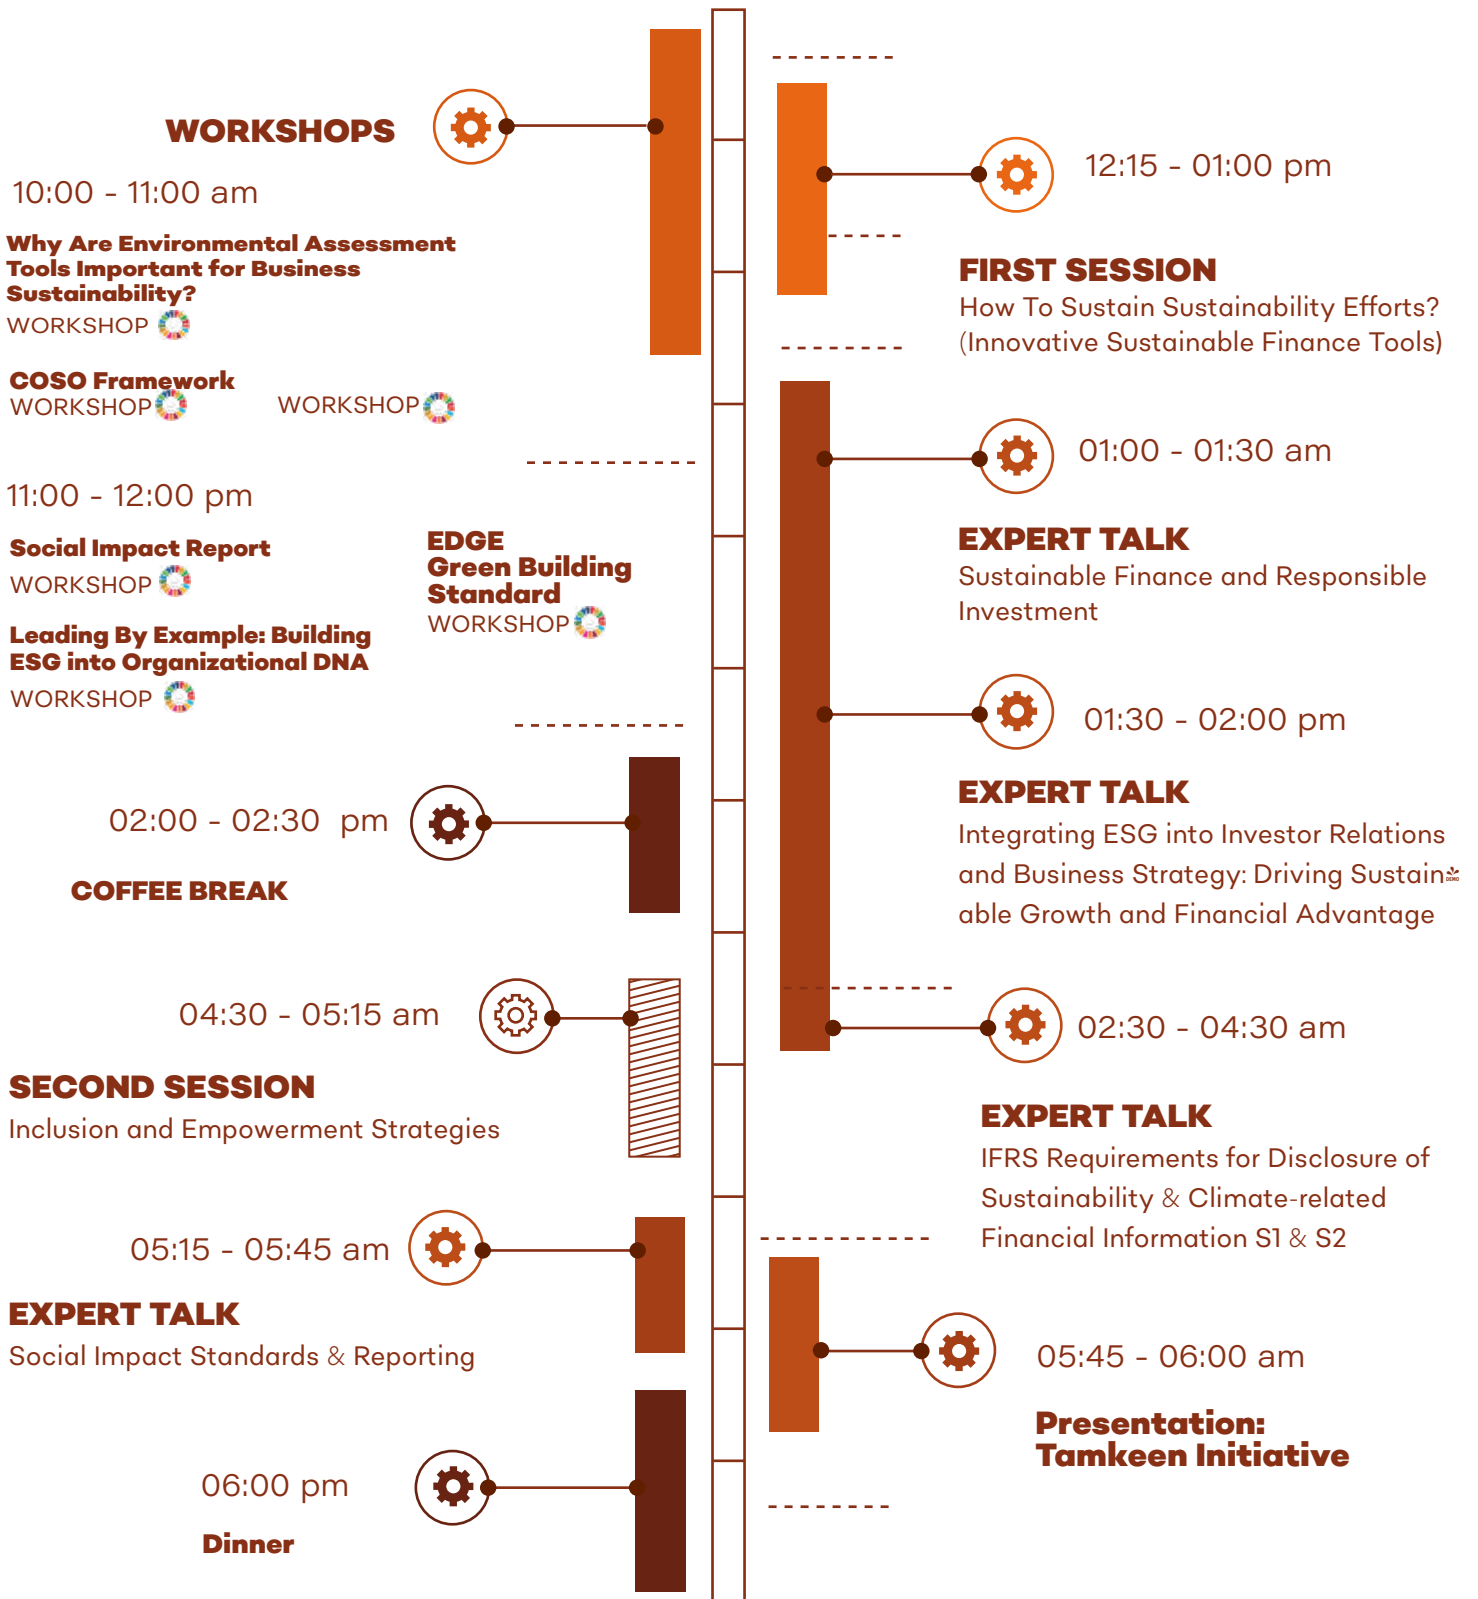

06 EXPERT TALK

How companies Be Ready to Properly Issue Sustainability Reports (Internal Reporting Life Cycle)

02 FIRST SESSION

How To Sustain Sustainability Efforts? (Innovative Sustainable Finance Tools)

DAY 2 : Sustainable Finance

Overview:

The shift towards a low-carbon economy has become a necessity and a priority on the countries' agendas to ensure sustainable growth and build their capacities to withstand and face the challenges of climate change. Therefore, there are increasing efforts by the Egyptian government and local and international development partners in order to provide innovative financial tools and enhance ways of mobilizing capital towards climate-related activities and industries that promote sustainability and minimize negative environmental impacts.

In recent years, carbon markets have emerged as one of the most widespread and effective tools for securing the funding needed for green transformation as well as sustainable bonds (which include green, social, sustainability, and sustainability-linked bonds) are experiencing increasing demand both regionally and internationally, aligned with the growing interest in achieving the SDGs and tackling the challenges of climate change. Therefore, Egypt is keen to strengthen its position as a regional leader in sustainable financing by issuing more green and social bonds, as well as sustainability sukuk, as a fundamental step in its journey towards a green and sustainable future.

Thus, the session addresses the key factors to ensure the success of carbon markets, the mechanisms for achieving transparency and financial integrity in carbon markets, and. The session also focuses on the pivotal role of the financial sector as a funder and trader of carbon credits, in addition to the guidelines for sustainability bonds and sukuk, and how they align with local contexts.

Key Topics:

- The key drivers of carbon markets growth.
- Overview of financial products and tools capable of flourishing sustainability and development efforts.
- Opportunities to expand the sustainable bond market and issuances by sovereign and corporate issuers in developing countries.
- Best international practices in issuing these bonds.
- How can the sustainable bonds' proceeds be used to build strong local capital markets?
- How to enhance collaboration with international partners and financial institutions to support R&D and investment in producing green hydrogen?

03 EXPERT TALK

Sustainable Finance and Responsible Investment

Suggested Speaker :

•**Dr. Prasad Modak** ,

Executive President of Environmental Management Centre
LLP (EMC)

DAY 2 : Sustainable Finance

04 EXPERT TALK

Integrating ESG into Investor Relations and Business Strategy:
Driving Sustainable Growth and Financial Advantage

Overview:

This talk will examine the growing influence of ESG on corporate strategy and investment decisions, as investors increasingly rely on ESG ratings to assess a company's long-term resilience and credibility. With regulatory oversight becoming more stringent, businesses must strengthen risk management, compliance, and overall performance. By connecting sustainability initiatives to financial outcomes, the session will provide actionable strategies for attracting investment, enhancing corporate reputation, and seizing new market opportunities.

It will also explore the expansion of ESG-driven fixed-income markets, demonstrating how strong ESG ratings can help issuers reduce the cost of capital and secure better financing terms by mitigating risk and increasing investor confidence.

Speaker:

- **Mr. Paolo Casamassima**,
CEO at MEIRA (Middle East Investor Relations Association)
- **Dr. Maali Khader**,
Founder & CEO of Schema

05 EXPERT TALK

Expert Talk: IFRS Requirements for Disclosure of
Sustainability & Climate-related Financial Information S1 & S2

Overview:

Nowadays, it's a critical factor to ensure your company's compliance with current and future regulatory requirements in the areas of sustainability and climate in order to maintain a successful business model.

DAY 2 : Sustainable Finance

During this talk you will gain an in-depth understanding of the Reporting Standards (IFRS S1, IFRS S2) methodology, it also will interpret the requirements of the IFRS S1 (Sustainability Reporting – General Requirements) and IFRS S2 (Climate-related Disclosures standards, which aim to improve the quality and comparability of information about the impact of organizations' activities on sustainability and climate.

The talk will discuss how to use IFRS S1 and S2 reporting to manage risks related to sustainability and climate, as well as to develop strategies and management decisions.

Moreover, it will explain how to assess the impact of business strategies on sustainability and climate, and propose ways to optimize and improve, in addition to the mechanisms of analyzing data and transforming it into a structured report that reflects the economic, environmental, and social aspects of an Organization's operations.

Speaker:

• **Mr. Haytham Torkey**,
CEO and Managing Partner at United Accountants Member
of Nexia International

06

SECOND SESSION

Inclusion and Empowerment Strategies

Overview:

CSR agenda has become a vital component of a company's success. Therefore, this session will expand your understanding and update visionary companies committed to CSR, the best activities strengthen communities and people empowerment and the effective inclusion strategies.

It also will discuss the CSR empowerment activities and highlights the importance of the positive effect they have on society by way of improving health, education and skills of the individuals and local communities.

The session will explore the diverse four levels and types of CSR pyramid including; environmental responsibility, ethical/human rights duty, philanthropic responsibility, and economic responsibility. In addition to unveiling the key factors that can revolutionize your branding efforts while creating a positive social impact.

Key Topics:

- What are the 4 major types and levels of CSR?
- The best practices of creating a successful inclusion and empowerment strategy.
- How to achieve integration between different CSR empowerment programs and activities?
- What are the latest tools and methodologies for measuring and monitoring the SROI?

DAY 2 : Sustainable Finance

02 FIRST SESSION

Mechanisms of Opening New Markets and Increasing Export Rates - Quality Standards and Certifications Aligned with Environmental Sustainability Standards

Overview:

In light of Egypt's plan to reach \$100 billion in exports, as directed by President Abdel Fattah El-Sisi, along with the procedures and incentives adopted by the Egyptian government to encourage productive industries, enhance the efficiency of local companies, and boost the competitiveness of local products, there is an urgent need to develop and build an integrated system that keeps pace with rapid changes and aligns with global standards and specifications to carve out a space for itself and increase its ability to access and penetrate foreign markets.

DAY 3: Export & International Markets Penetration

Therefore, the session will review mechanisms for opening new markets, the components for creating a supportive environment to empower local companies and boost their export capabilities, as well as the key certifications and accreditations that local companies need. Also, it highlights the most important promising sectors in Egypt for increasing exports and discuss their growth opportunities and sustainability. It will also shed light on these sectors and how to expand their activities, as well as the latest marketing strategies needed to enhance the reach of these products to international markets.

Key Topics:

- Mechanisms of opening new markets for Egyptian exports and strategies for penetrating global markets.
- The key quality certifications and accreditations required to meet global specifications and environmental sustainability standards.
- Overview of the efforts made and the initiatives available to empower the private sector and increase exports.
- Drivers of growth for promising sectors to increase exports.
- Showcasing experiences and success stories of the Key Sectors That Have Increased Their Egyptian Exports Overseas.

03 EXPERT TALK

CBAM, Its Role In Unlocking New Markets, and the Economic Impact It Will Have On Egypt and MENA

Overview:

The European Union's Carbon Border Adjustment Mechanism (CBAM) will impose a cost on carbon emissions for imported goods starting in 2026. This development could significantly disrupt trade flows between Egypt, North Africa, and the EU, particularly since EU-bound exports account for approximately 25% of Egypt's total exports. The implementation of the CBAM presents both challenges and opportunities, as the region grapples with its impact on key industries and the broader economic landscape. The policy will not only influence trade but also spark a shift in industrial strategies, environmental policies, and diplomatic relations across MENA countries.

This talk will delve into the CBAM's potential effects on Egypt and North Africa, exploring industry responses to the carbon cost, regional adaptations, and policy evolution in response to these changes. It will examine how MENA countries are addressing the challenges posed by the CBAM and what future developments in international trade and policy might look like under this new mechanism.

Speaker:

- **Mr. Dan Maleski**, Lead CBAM Advisor | Environmental Markets Consultant at REDSHAW

DAY 3: Export & International Markets Penetration

04 SECOND SESSION

Green Supply Chain and Green Materials

Overview:

As companies strive to align with global sustainability goals, adopting green supply chains and green materials has become essential to ensure the success and continuity of business models in light of the environmental, climate and economic challenges the world is witnessing. Therefore, the session reviews the most important companies and entities that provide green products and sustainable materials that are consistent with environmental sustainability standards. It focuses on the importance of shifting towards environmentally friendly materials, recycling, and ensuring building sustainable supply chains.

The session will explore how incorporating sustainable practices into the supply chain not only enhances environmental performance, but also increases operational efficiency, saves costs and creates competitive advantage. The session also addresses how the strategic use of green materials and responsible supply chain management can reduce the environmental footprint and ensure a more sustainable future.

Key Topics:

- How can companies integrate green supply chain practices and green materials into their operations?
- Examples of latest available materials that minimize environmental impact, such as recyclable, biodegradable, and renewable resources.
- What is the ROI of adopting green supply chain transformation?
- What is the impact of innovative technology on monitoring and transition towards green supply chain?
- Showcasing successful experiences and case studies of green and sustainable materials.
- What are the challenges of adopting green supply chain and the actionable strategies to overcome them?

Speaker:

- **Eng. Hisham El-Gammal**, CEO OF Infinity Capital & Chairman of the Benban Solar Developers Association- BSDA.
- **Dr. Mohammed Al Surf**, Co-Founder & Managing Director at Tilad Sustainability Co. and Founder & President of the Sustainability Professional of Saudi Arabia Association (SPSA)
- **Eng. Amr Nader**, CEO of A³&Co.
- **Eng. Amany Arafa**, Executive Chairwoman of Delta Building Systems and CEO of RMG Egypt for Energy Projects.

DAY 3: Export & International Markets Penetration

05 **Sustaining Sectors**

Sustainability of the construction and building sector.

(The industries of constructions, building materials, real estate, steel, cement, Paints, etc.)

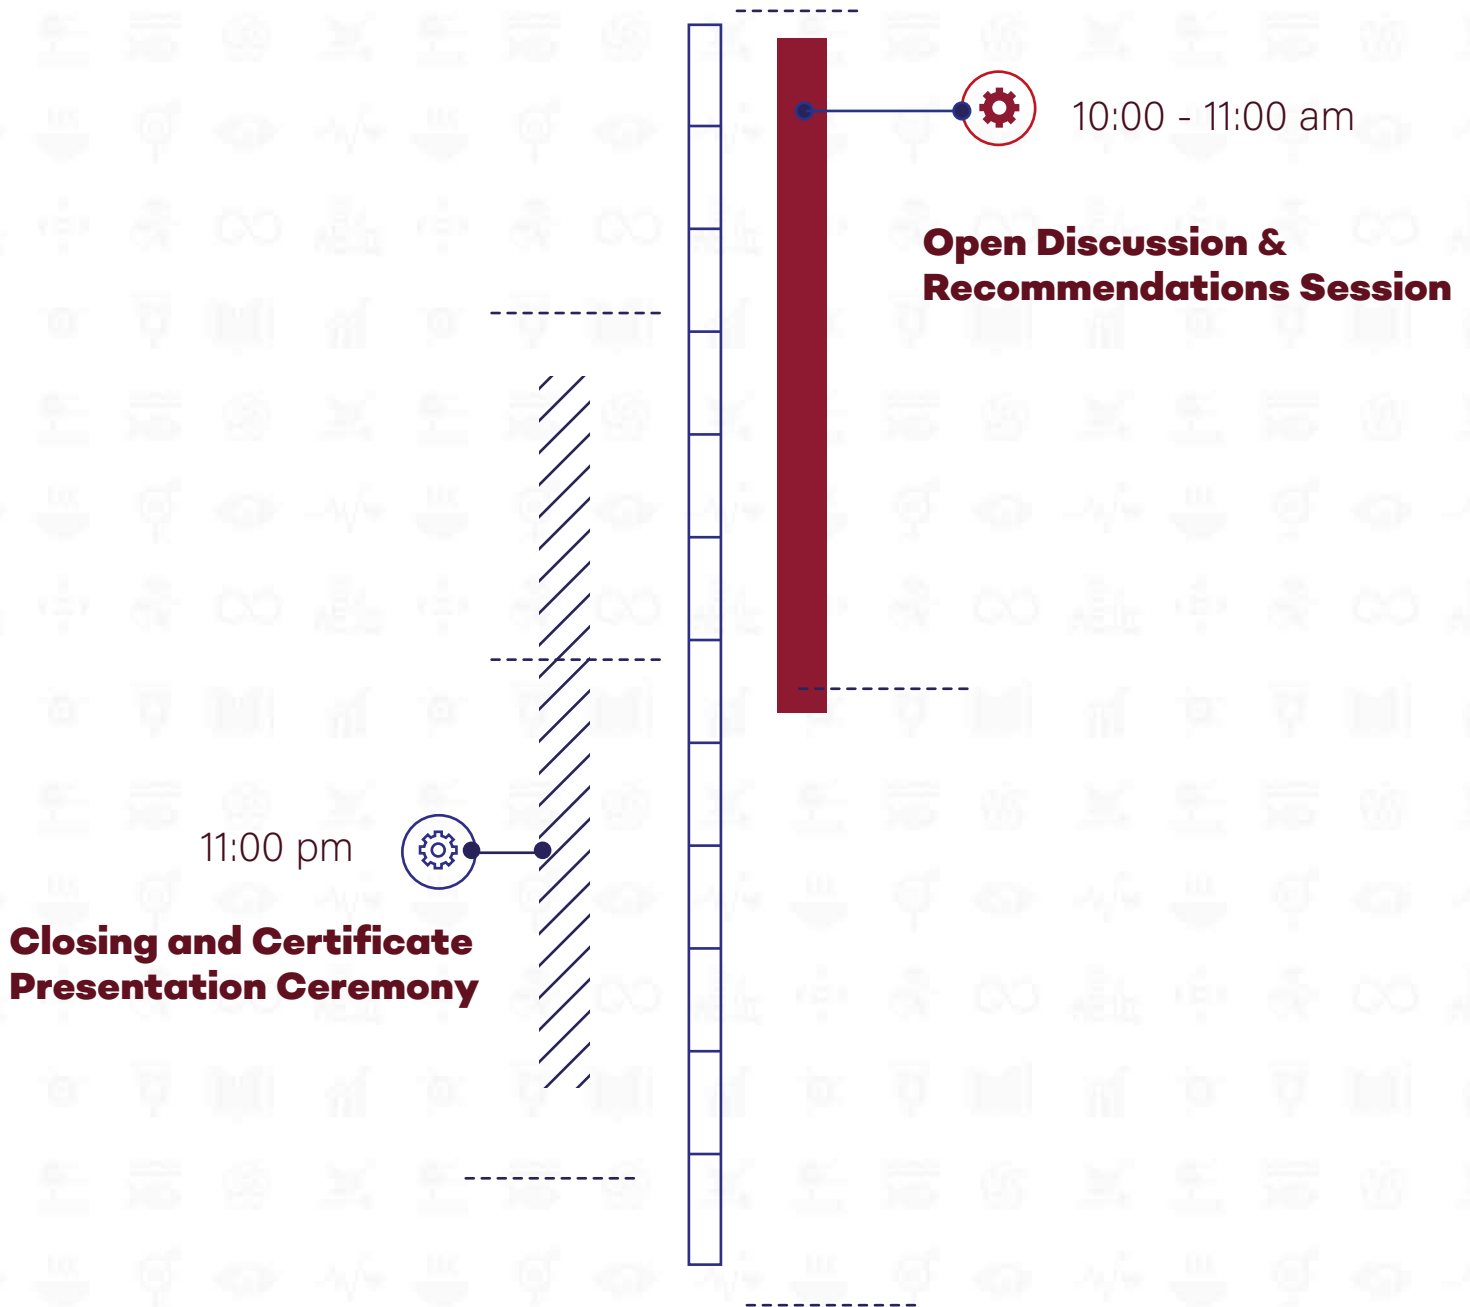

Sustainability of the Agricultural Manufacturing Sector.

(The Sustainable agriculture, organic farming, and food & beverage industries)

Sustainability of the fertilizers and petrochemicals sector.

(Propylene, Ethylene and its derivatives, Rubber, plastics, detergents, dyes, fertilizers, pesticides, textiles, solvents, cosmetics, pharmaceuticals, pipes, etc.)
