Where the Right Questions
Find the Right Answers
Ask & Act

Introduction:

In alignment with the directives of His Excellency President Abdel Fattah El-Sisi, the Egyptian government is actively pursuing sustainable development across all sectors as part of Egypt's Vision 2030 as well as in a world swept by economic, social, and environmental transformations, sustainability is no longer a secondary option, but rather a strategic necessity to ensure business continuity and enhance the competitiveness of the national and regional economy. Over the past years, the business community in Egypt has proven itself a true partner in the development process, supporting the state's efforts to address challenges and contributing to formulating practical solutions that achieve a balance between economic growth and social and environmental impact.

In this spirit, the 16th CSR & Sustainability Forum, held under the theme "From Vision to Implementation: The Right Place to Ask the Right Questions... Ask and Act." serves as a leading national and regional platform bringing together business leaders, investors, experts, decision-makers, civil society representatives, and international institutions to discuss the most important issues, opportunities, and challenges facing the business community on its journey toward green transformation and sustainable development.

The 16th edition of the forum goes beyond presenting theoretical insights and discussions. Rather, it seeks to provide participants with a Sustainability Toolbox of inspiring tools, policies, and experiences that will help them transform fundamental questions into practical answers, and the answers into actionable plans within their organizations.

Over three days, the forum will discuss ten key themes covering governance and policies, green finance, the circular economy, innovation and technology, supply chains and international trade, education and capacity building, risk management and future opportunities, and other issues of concern to the business community in Egypt and the Arab region. A series of interactive workshops will also be held, giving participants the opportunity to experiment with practical tools and formulate innovative solutions that support their competitiveness in the markets.

This forum represents an open invitation to the business community to be a pivotal player in shaping a sustainable future for Egypt and the region, proving that the private sector is not merely a beneficiary of development, but rather a key driver of it. We believe that sustainability is a gateway for companies to broader markets, greater investment opportunities, and more stable growth.

In the right place for the right question, companies will find the answers they are looking for, and will leave the forum with clear plans and practical steps that enable them to ask and act, so that the vision turns into a tangible impact that supports business competitiveness and serves the future of coming generations

Stakeholder

More than 550 stakeholders from government, international organization, experts

Action

More than 45 networking event matchmaking gathering during the past 10 years

Impact

We launch 12 initiatives in collaboration with private sector, NGOs, and government to make viral impact on society

OUR MILESTONE

2014

The first platform that brings together those interested in sustainable development in Egypt to exchange experiences, unite efforts and build capacities.

2016

The first news portal that comprehensively reports on the social responsibility and sustainable development endeavors undertaken by private entities, civil society, and government.

2017

was established to spread awareness among companies and state institutions on the importance of fulfilling their social responsibilities.

2018

The first platform of its kind to unite individuals who are passionate about climate issues, the transition towards green economy, and mechanisms of procuring the essential funding to support these initiatives

2020

A professional platform focuses on delivering scientific content, studies, research, and reports that cater to various sectors in order to integrate sustainability standards and build capacities within them.

2022

An interactive platform that shapes a shared vision among stakeholders in various sectors through targeted round table discussions

2023

A novel educational platform for kids that offers simplified cartoon based content on sustainable development concepts. The ultimate goal is to inculcate a culture of sustainability among future generations and encourage them to practice it in their daily lives.

2025

Recognizing excellence in sustainable development practices aligned with Egypt vision 2030 and the UN SDGs.

2025

is a non-profit development organization established with the aim of embedding the concepts of sustainable development in the minds of new generations through specialized education and training.

2026

The professional platform that encompasses all aspects of sustainable development. It offers a wide range of resources including events, news, articles, and research all in one location.

2026

is a business media platform dedicated to leadership and executive insight. It highlights the voices of CEOs and business leaders through in-depth articles, exclusive interviews, podcasts, and curated quotes. CEO Plus delivers practical perspectives on leadership, innovation, sustainability, and growth strategies, helping decision-makers navigate the future of business.

2026

a creative AI-powered media studio crafting cinematic visual stories for brands, startups, and organizations. Brands stand out through high-impact visuals, AI-driven ads, and storytelling that feels more like a film than a campaign.
